Meadowfield Park Survey, October 2023. The Views of 279 Children

Over 80% of children reported that they use the park at least once a week with half saying most days. The remainder said once a month or less often.

When asked what they most liked about the Park, children gave the following, in order of priority

- 1 Hanging out with friends
- 2 The play areas, sledging and the woods
- 3 Playing football and picking brambles

When asked what activities they most like to do, children gave the following answers:-

The great majority want to **plant wild flowers**, closely followed by **plant trees**. Almost as many want to **learn about the Park's wildlife** and **pick other kinds of fruit (as well as brambles)**.

(There was also some interest in clearing the ground for wild flowers and trees.)

Children also made widespread unsolicited requests for

the flying fox to be repaired, to have more play equipment and to add another football goal and nets.

A few other requests agree with some of the adult respondents for **more and better picnic benches** and **bins**.
